

At Enbridge, we believe a community belongs to everyone who lives there. And, no matter who we are or where we live, all of us want to make life better for our families, our friends, our neighbors and ourselves.

We exist to help fuel quality of life within communities where we work and operate in North America, and we do this by partnering with organizations that champion solutions for safety, environmental and social issues. In 2017, we invested more than \$19.1 million in community-strengthening initiatives across the United States and Canada.

### Hale Reservation—Helping Hands in Action Program

In Massachusetts, Enbridge and its legacy companies Spectra Energy/Algonquin Gas Transmission have made community service and support initiatives a corporate priority for decades. One of the efforts we are most proud of is our partnership with Hale Reservation in Westwood through our “Helping Hands in Action Program”—a concentrated volunteer effort specifically designed to give back to the local communities where the company operates.

Hale, currently celebrating its centennial year, offers educational and recreational opportunities that develop

self-confidence, inspire passion for learning, and encourage appreciation for the natural environment for over 15,000 children and families from 70 Greater Boston communities. For years, our employees have been volunteering at Hale to help with a variety of needs including painting and staining structures, tables and chairs and clearing and removing brush. In addition to the thousands of hours of volunteer time our employees have given, we have also made financial donations to Hale through the Helping Hands in Action Program to support its important mission. We are proud to have been honored by Hale with its annual Community Service Recognition Award and continue to support this wonderful organization each year.

In 2017, we invested more than \$19.1 million in community-strengthening initiatives across the United States and Canada.

This is just one example of how Enbridge and its employees are making a positive difference in the communities where we live and work.
