

IBM approaches societal challenges by applying our talent and technology to innovative solutions for education, economic development, environmental sustainability, healthcare and more.

Teacher Advisor With Watson

Teacher Advisor With Watson, IBM Corporate Citizenship's completely free online web tool, is helping thousands of K-8 teachers save valuable time as they plan highly effective lessons for all their students. The site offers over 8,000 quality, vetted instructional resources, all curated by former educators, and surfaced intelligently by Watson. By providing free, easy access to curated lesson plans, student-facing materials, and instructional strategies from respected providers, Teacher Advisor helps educators spend less time planning, and more time thinking about how to get their students engaged with and excited about grade-level mathematics.

Teacher Advisor With Watson—from IBM & UnboundEd—is a 100% free, web-based tool that can help save elementary and middle school math teachers (grades K-8) valuable time in planning effective, aligned lessons.

- Exclusive resources from the National Center for Learning Disabilities
- Targeted and ranked recommendations that you can download or save for later

Teacher Advisor helps educators spend less time planning, and more time thinking about how to get their students engaged with and excited about grade-level mathematics.

- All materials presented in context to help you build expertise and spark ideas
- UnboundEd reviews and vets all materials available on Teacher Advisor
- Watson has been trained to understand searches for hands-on activities
- We regularly speak with our users to get their feedback and ideas for new features
